I am a professional passionate about technology and programming, currently looking for an opportunity to improve my skills and contribute to the work environment in the area of programming and technology.

EXPERIENCE

2023 – 2023

SQL, PERSONAL PROJECTS

I created tables in PostgreSQL and acquired basic knowledge in the area of databases. I am able to create, modify and consult data in tables. I will soon expand my knowledge to include MySQL. Soon I will post some projects on my GitHub profile.

2023 – 2023

JAVA, PERSONAL PROJECTS

I've developed a variety of small Java applications (over 80 programs), most of which run on the console. Recently, I completed a project with a graphical user interface (GUI) and integration with a DBMS. You can follow my projects on my GitHub profile.

2022 – 2023

PYTHON, PERSONAL PROJECTS

I created several applications and simple games in Python (in console), applying the knowledge acquired through courses at Alura and on the internet in general. Many of these projects are available on my GitHub profile. I recently refactored some of my Java code into Python and added a GUI for a choice game.

2022 – 2023

HTML/CSS/JAVASCRIPT, PERSONAL PROJECTS

I developed small websites, including my own portfolio website, using knowledge acquired at Alura, through videos and online documentation. I started with basic projects and gradually gained skills to create my portfolio website.

2017 – 2022

BEAUTICIAN, MASCOTES & CIA

I worked as a beautician, being responsible for the hygiene and beautification of the animals, organization and cleanliness of the work environment. I also worked in customer service and operating the store's cashier. During that time, I maintained positive relationships with colleagues and clients.

EDUCATION

APRIL, 2023

COMPUTER SCIENCE, UNIRITTER - ZONA SUL

I'm in my first semester of college, currently learning software modeling, programming computational solutions in addition to life and career projects, classes that give me a good idea of what to expect from the job market.

OCTOBER, 2022

PROGRAMMING, ALURA

I currently have 19 complete courses on the Alura platform. Linked below are all of my completed courses that may not be up to date in this curriculum:

<https://cursos.alura.com.br/user/jpgercc>

HARD SKILLS

- Java
- SQL
- Python
- HTML
- CSS
- Inglês

SOFT SKILLS

- Communication
- Problem solving
- Time management
- Creativity
- Organization
- Emotional intelligence
- Work ethic

ACTIVITIES

I breathe technology and programming, and I have made this passion a fundamental part of my life and also my future career. I dedicate my free time to studying and applying my knowledge, creating small programs that I share on GitHub. Most projects in Java have not yet been posted. I am constantly updating myself on the latest trends and technological advances. I learn with enthusiasm, and my free time is devoted almost exclusively to improving my skills and knowledge. In addition, I have relevant certificates, which can be accessed through this [hiperlink](#) (formal certificates I will send via gmail), all obtained in the largest tech choice in the country; Alura. I look forward to contributing my knowledge and enthusiasm to a team that values innovation and technical excellence.
